

EMILY B. ANSELL, PH.D.
ASSOCIATE PROFESSOR
DEPARTMENT OF BIOBEHAVIORAL HEALTH
PENNSYLVANIA STATE UNIVERSITY

ADDRESS Department of Biobehavioral Health
Pennsylvania State University
214 Biobehavioral Health Building
Email: eba108@psu.edu

EDUCATION

- 1999 - 2005 **Ph.D., Clinical Psychology, The Pennsylvania State University**
University Park, PA
- 1997 - 1999 **M.S., Psychology, Villanova University**
Villanova, PA
- 1993 - 1997 **B.A., Psychology, *cum laude*, Wake Forest University**
Winston-Salem, NC

CAREER & ACADEMIC APPOINTMENTS

- 2019 – present **Associate Professor, Department of Biobehavioral Health;**
Penn State Neuroscience Institute;
Social Science Research Institute Co-Fund;
Center for Cannabis and Natural Product Pharmaceuticals
Pennsylvania State University, University Park, PA
- 2016 – 2019 Associate Professor, Department of Psychology & Program in Neuroscience,
Syracuse University, Syracuse, NY
- 2011 - 2016 Assistant Professor, Department of Psychiatry, Yale University School of
Medicine, New Haven, CT
- 2010 - 2013 Assistant Director of Research, Yale Stress Center, Yale University School of
Medicine, New Haven, CT
- 2008 - 2011 Associate Research Scientist, Department of Psychiatry, Yale University School
of Medicine, New Haven, CT
- 2005 - 2008 Postdoctoral Associate, Personality Disorders Research Program, Department of
Psychiatry, Yale University School of Medicine, New Haven, CT

PROFESSIONAL INVOLVEMENT, HONORS OR RECOGNITION

- 2019 – present **Health and Social Disparities Cluster**, Social Science Research Institute, Penn State University
- 2023 – present **Initiative for Faculty Success and Equity Committee**, Penn State University
- 2022 – present **Graduate Committee**, Department of Biobehavioral Health, & 2020 – 2021 Penn State University
- 2017 – present **Ad Hoc Reviewer, National Institutes of Health**
Chair, Time-Sensitive Opportunities for Health Research Study Section
 Time-Sensitive Drug Abuse Research Study Section
 Mechanisms of Emotion, Stress, and Health Study Section
 Drug Abuse Panel for PAR 16-234
 Addiction Risks and Mechanisms Study Section
 Biomedical Computing and Health Informatics Study Section
 Interventions and Mechanisms of Addiction, Special Emphasis Panel
 Adult Psychopathology and Disorders of Aging Study Section
- 2023 – 2024 **Chair, Rural Health Disparities Faculty Search Committee**, Department of Biobehavioral Health, Penn State University
- 2021 – 2022 **Chair, Care & Compassion Faculty Search Committee**, Department of Biobehavioral Health, Penn State University
- 2019 - 2020 **Research Committee**, Department of Biobehavioral Health, Penn State University
- 2019 **Society for Ambulatory Assessment** Program Chair and Conference Host
- 2018 – 2019 **Co-director, Aging, Behavioral Health, & Neuroscience Cluster**, Syracuse University
- 2017 – 2019 **Health & Wellbeing Research Steering Committee**, Syracuse University
- 2017 – 2019 **Executive Committee**, Psychology Department, Syracuse University
- 2017 – 2018 **Curriculum Committee**, Psychology Department, Syracuse University
- 2014 – 2020 **Consulting Editor**, Assessment
- 2012 – 2020 **Consulting Editor**, Journal of Personality Assessment
- 2017 – 2018 **Promotion & Tenure Committee**, College of Arts & Sciences, Syracuse University
- 2016 – 2017 **Workload Allocation Policy Committee**, Psychology Department, Syracuse University
- 2016 **External Reviewer**, Swiss National Foundation
- 2015 – 2016 **External Reviewer**, Center for Translational & Basic Research, CUNY Hunter
- 2013 – 2016 **Co-Director**, Yale/ National Education Alliance -BPD Conference
- 2013 - 2014 **Past President**, Society for Interpersonal Theory & Research
- 2009 - 2013 **Planning Committee**, Yale/ National Education Alliance-BPD Conference
- 2012 - 2013 **President**, Society for Interpersonal Theory & Research
- 2007 - 2012 **NIH Clinical Research Loan Repayment Program** – Competitive Award
- 2011 - 2012 **President-Elect**, Society for Interpersonal Theory & Research
- 2010 - 2011 **Editor** for the Society for Interpersonal Theory and Research Newsletter
- 2009 - 2011 **Member-at-large**, Executive Committee, Society for Interpersonal Theory

2009 & Research
 2008 - 2010 **External Reviewer**, Faculty Research Grants, Villanova University
Associate Editor, Society for Interpersonal Theory and Research Newsletter

RESEARCH SUPPORT

Current Grants:

R01 DA056137	Ansell/ Claus (MPI)	9/30/2023 – 06/30/2028
NIH/ NIDA		\$3,947,331
“Neurobehavioral Effects of Frequent Co-use of Alcohol and Cannabis”		

This study will examine the moderating effects of substance use group and sex on a) neural/neuroendocrine reactivity to stress, b) the within-person association between stress and craving/use in the moment, and c) trajectories of craving/use over time (1 year). We will also explore whether individual differences in neural and neuroendocrine reactivity to stress are risk factors that moderate a) the within-person association between stress and craving/use in the moment and b) trajectories of craving/use over time.

Role: Principal Investigator

R01 DA034067	Lankenau/Wong (MPI)	4/15/2024 – 6/30/2029
NIH/NIDA		\$3,773, 345
“Medical Marijuana, Emerging Adults, and Community: Connecting Health and Policy”		

This project aims to identify patterns of controlled vs problematic cannabis use across different policy environments for clinical and community-wide dissemination to fill research and practice gaps and advance understanding of safer and controlled use of cannabis.

Role: Co-Investigator

R01 AA030262	Turrisi (PI)	7/1/2022 – 6/30/2027
NIH/ NIAAA		\$3,057,809
“A randomized clinical trial: Examining a brief parent-intervention to reduce college student drinking and cannabis use”		

This study will use a rigorous RCT design to examine: 1) The efficacy of the e-PBI+, an established parent-intervention for alcohol use that has been broadened to include cannabis, and at 3, 6, 9, and 12 months post-baseline relative to an active comparison condition (our evidence-based parent intervention, the e-PBI), and an attention-matched-control condition (e-AC), on reducing alcohol and cannabis use and consequences (efficacy; Aim 1); 2) Examine the process by which the e-PBI+ influences parents’ and college students’ behaviors (mediation; Aim 2); and 3) Examine subgroups for whom the e-PBI+ is more versus less effective (moderation; Aim 3). To the extent that the research is successful, it will provide an easy to implement and low-cost

parent-intervention that provides new cannabis content for parents to have discussions with their college-bound teens about alcohol and cannabis.

Role: Co-Investigator

K02 DA058840	Chaplin (PI)	7/1/2023 – 6/30/2027
NIH/NIDA		\$625,830
“Integrating neural and momentary assessment of parenting, arousal, and adolescent substance use”		

This Independent Scientist K02 Award will provide crucial advanced training to enhance and transform Chaplin’s program of research by integrating ecological momentary assessment (EMA) science to understand from a neural and momentary level parenting, emotion, and substance use associations. It will also support a research study that would add EMA data collection to my already-recruited longitudinal cohort of adolescents to examine the interplay between neural responses (in fMRI) and momentary vulnerabilities to support future developmental studies and smart-phone delivered momentary intervention development studies.

Role: Primary Mentor

K08	Forrest (PI)	7/1/2024 – 6/30/2028
NIH/NIMHD		
“Predicting acute and dynamic suicide risk in rural sexual minorities”		

This project uses an innovative mixed methods approach to clarify acute and dynamic mechanisms underlying suicidal thoughts and behavior disparities among rural sexual minority adults. This project will inform therapeutic targets for suicide prevention in this uniquely high-risk population.

Role: Primary Mentor

F31 DA056066	Kisner (PI)/Chaplin (Sponsor)	7/1/2024 – 6/30/2026
NIH/ NIAA		
“Intensive Longitudinal Associations between Stress, Mindfulness, and Alcohol Use in Highly Stressed Mothers”		

This study will utilize advanced statistical methodology to examine how cannabis co-use occasions with alcohol and/or tobacco affect momentary subjective drug abuse liability effects of cannabis and whether subjective responses to co-use lead to increasingly hazardous cannabis use over time in young adult recreational cannabis users. Findings from this study may inform intervention approaches to decrease the public health burden of cannabis use disorders among young adults who co-use.

Role: Co-Sponsor

T32 DA017629 Fang (Student Awardee) 7/1/2024 – 6/30/2026
 NIH/NIDA
 Prevention and Methodology Training Predoctoral Fellowship
 “EMA, Sexual and Gender Minorities and Substance Use”
 Role: Methodology Mentor

Pending Grants:

R01 DA057702 Ansell/ Eiden (MPI) 9/1/2024 – 8/31/2029
 NIH/NIDA
 “Pre/postnatal substance exposure and adolescent substance use: Role of mother-child dyadic processes from infancy to adolescence and daily experiences in adolescence”

This project will continue follow-ups on an existing cohort of parents and prenatally exposed (Tobacco, Tobacco + Cannabis, Control) teenagers and add Ecological Momentary Assessment to examine bidirectional associations between maternal regulation and child regulation during mother-child interactions from infancy to adolescence as mechanisms underlying the association between prenatal risk and adolescent substance use, substance related cognitions, and risk behaviors (collectively termed adolescent risk behaviors). Across time, contextual adversity, maternal postnatal substance use, and peer behavior may serve as sources of risk or protection in the initiation and escalation of adolescent risk behaviors.

Role: Principal Investigator

Score: 27/ 8th percentile

R01 Ansell/ Claus (MPI) 4/1/2025 – 3/31/2030
 NIH/ NIDA
 “Neurobehavioral mechanisms of craving response in co-use of cannabis and alcohol”

This study will investigate reward system dysfunction by combining longitudinal assessments of neural measures of cue reactivity with ecological momentary assessment of drug cue exposure in the real world, craving, and use in daily life. We will recruit individuals into four groups: those who use cannabis and alcohol simultaneously, those who use alcohol only, those who use cannabis only, and controls who report minimal alcohol and cannabis use. The proposal will focus on neural changes in reward networks that occur over time (3 multimodal assessments over 2 years) that are moderated by group status, the relationship between drug cues and craving or use in the real world, and the moderating role of neural responses to cues on the associations between cues and craving/use in the real world.

Role: Principal Investigator

R01 Forrest (PI) 9/1/2024 – 8/31/2029
 NIH/NIHMD
 “Short-Term Suicide Risk Processes for Sexual Minorities at the Intersection of Sexual Orientation, Gender, Race, Ethnicity, and Geographic Location”

Heightened suicide thoughts and behaviors (STBs) prevalence for Sexual Minority (SM) with multiple marginalized sexual orientation, gender, and racial and ethnic identities could be due to these individuals experiencing compounding forms of discrimination. Further, STB prevalence could be even higher when individuals with multiple marginalized identities live in rural areas, because rural areas are high-stigma, low-resource contexts. This R01 will address critical research gaps by applying an intersectional lens to determine how multiple forms of discrimination and discrimination contexts impact short-term STB risk processes among SM adults. The aims will address (1) how daily discrimination experiences increase short-term STB risk, (2) how these effects vary by intersectional identities, and (3) whether geographic context moderates how daily discrimination increases STB risk among SM.

Role: Co-Investigator

R01 Blaine (PI) 4/1/2025 – 3/31/2030
NIH/NIAAA

“Multimodal assessment of neural, neuroendocrine, and immune cue responses in binge drinkers in the laboratory and real world”

The goal of this application is to examine specific neurobiological factors (i.e., neural, neuroendocrine, and immune) potentially underlying binge drinking, based on the premise that these neurobiological changes reflect real world processes that make individuals more vulnerable to drinking in response to alcohol cues in daily life.

Role: Co-Investigator

R01 Fox/ Ray (MPI) 7/1/2024 – 6/30/2029
NIH/NIAAA

“Guanfacine for women with AUD: A multisite study using a telehealth approach”

This study will address the need for new relapse prevention medications tailored to women by examining guanfacine’s efficacy in women with AUD. We will also inform the efficacy of telehealth and EMA techniques for encouraging women to participate in clinical trials for AUD.

Role: Co-Investigator

R21 Fox (PI) 7/1/2024 – 6/30/2029
NIH/NIAAA

“The role of Exosomal Micro RNA (miRNA) in alcohol craving and drinking in individuals with Alcohol Use Disorder (AUD)”

This study will examine the role of exosomal miRNA in craving and drinking behaviors measured both in the laboratory under stress conditions, and in daily life and naturalistic settings using EMA techniques.

Role: Co-Investigator

R01/Competitive Supplement Ansell (PI) 1/1/2017 – 8/31/2023
 NIH/ORWH \$97,500
 “Gender Differences in Momentary Cannabis Use Effects in Young Adults”

This supplement, awarded by the Office of Research in Women’s Health supports an increase in sample size, measurement of sub-phase of menstrual cycle, and examination of momentary drug abuse liability effects of cannabis in the daily lives of young adult women in the parent award.
 Role: Principal Investigator

B/START R03 DA047516 Thomas (PI) 4/1/2019 – 3/31/2023
 NIH/NIDA \$75,000
 “The Effect of Resistance Exercise on Craving and Cannabis Use in Individuals with Cannabis Use Disorder”
 Role: Co-Investigator

T32 DA017629 Bedillion (Student Awardee) 7/1/2021 – 6/30/2022
 NIH/NIDA
 Prevention and Methodology Training Predoctoral Fellowship
 “Cannabis Use and Mental Health”
 Role: Methodology Mentor

NARSAD Young Investigator Ansell (PI) 7/1/2016 – 6/31/2019
 Brain & Behavior Research Foundation \$70,000
 “Neuromarkers of Guanfacine Effects for Suicidality”

This study will evaluate the effectiveness of 8 weeks of Guanfacine a non-stimulant agent that is effective at ameliorating stress induced prefrontal dysregulation, in psychiatric patients at high risk for suicidality. 30 BPD patients will undergo imaging procedures pre and post 8 weeks of treatment on either Guanfacine or placebo. Both imaging procedures will involve stress and neutral (control) conditions so that brain responses associated with impulse control and emotion dysregulation while under stress can be examined.

Role: Principal Investigator

**Grant was selected by BBRF to be designated the “Families for BPD Research” Award*

Grant Ansell (PI) 1/1/2016 – 10/31/2017
 Peter McManus Charitable Trust \$50,000
 “Relationship Processes in Couples Coping with PTSD That Increase Risk for Hazardous Drinking”

Using the Actor-Partner Interdependence Model on intensive repeated longitudinal assessments collected via smartphones in both members of a couple over 14 days and ambulatory assessment of physiology and neuroendocrine markers, this study will examine the process by which daily experiences in PTSD+ couples exacerbate drinking related outcomes for both members of the couple. It will also explore for whom and in what contexts drinking behavior in a given day/instance may directly influence drinking behavior of the partner.

Role: Principal Investigator

K08 DA029641	Ansell (PI)	4/01/2011 – 3/31/2016
NIH/NIDA		\$839,500
“Interpersonal Behaviors, Stress, and Addiction”		

The work conducted with this Mentored Clinical Scientist Research Career Development Award examines phenomenology and assessment of addictive behaviors; psychobiological models of cumulative adversity, trauma, and stress; and ecological momentary assessment methodology and data analysis. It also incorporates training in neurobiological models of stress and addiction.

Role: Principal Investigator

R01DA033431	Chaplin (PI)	8/1/2013 – 7/31/2016
NIH/NIDA		\$180,460
“Parent-adolescent interactions and substance abuse risk: Gender differences”		

This project examines associations between parent-child interaction quality as measured via a laboratory stress paradigm and substance use and other behavior problems over the course of three years in a group of youth in early to middle adolescence with a particular focus on gender differences in pathways to risk.

Role: Site Principal Investigator

Competitive Supplement	Sinha (PI)	7/1/2015 – 6/30/2016
NIH/ NIDDK/ OBSSR		\$100,000
“Social-behavioral processes underlying highly palatable food craving, stress, and self-control”		

Obesity is a chronic medical condition and worldwide epidemic, increasing the risk of type II diabetes mellitus (T2DM), cardiovascular disease and other chronic diseases that are of great burden to the health care system. Understanding the complex biobehavioral mechanisms and sociobehavioral processes that affect self-management of food intake, energy expenditure and weight gain resulting in this chronic medical condition through examination of moment to moment sociobehavioral processes relating to stress, social context, and food intake are the foci of this project.

Role: Co-Investigator

Grant	Fox/ Ansell (Co-PIs)	1/1/2014- 7/1/2015
-------	----------------------	--------------------

Peter McManus Charitable Trust \$50,000
 “Immune System Adaptations Underpinning the Transition from Social to Hazardous Drinking”

The objectives for this grant are to examine the nature of peripheral cytokine (IL-1ra, IL-6, TNFa) changes during stress and whether these changes are able to predict hazardous drinking. We also aim to ascertain the extent to which anxiety, mood and ability to regulate emotion mediate this relationship. Hazardous and moderate drinkers were exposed to two personalized guided imageries (stress and relaxing) in a laboratory paradigm and psychobiological markers of stress, immune function, and self-reports were examined.

Role: Co- Principal Investigator

IRCSSA Pilot Grant Fox/ Ansell (Co-PIs) 7/1/2011 – 6/30/2012
 NIH/ Common Fund \$20,000
 “Immune system inflammation and personality moderators underlying cumulative stress and the transition from social to hazardous drinking.”

This pilot study, funded by the Interdisciplinary Research Consortium on Stress, Self-Control, and Addiction, examined how independent and combined effects of cumulative stress, personality, social processes, and drinking status (social VS hazardous) affect pro inflammatory (PI) and anti-inflammatory (AI) cytokines in a community sample. This 12 month study examines blood samples from 80 non-dependent drinkers for PI cytokines (tumor-necrosis factor- α ; TNF- α and interleukin-6; IL-6) as well as AI cytokines (interleukin-10; IL-10; interleukin 1 receptor antagonist; IL-1Ra).

Role: Co-Principal Investigator

Young Investigator Award Ansell (PI) 2/1/2010 – 1/31/2012
 American Foundation for Suicide Prevention \$85,000
 “Personality Disorders and Suicidal Behaviors: A Prospective Study of Associations, Mediators, and Moderators”

The primary aims of the proposed research are: (a) to test the prospective associations between anxious, personality disorders and suicide related outcomes and (b) examine whether the cumulative effect of multiple personality disorders is prospectively associated with suicide related outcomes and (c) to examine potential mediators and moderators of these relations, particularly interpersonal stressors, that may explain conflicting research findings and advance the understanding of why and for whom personality disorders lead to suicidal thoughts and behaviors.

Role: Principal Investigator
